-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1745

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kameda et al. - US 6,632,569 (Kameda) in view of JP-2002-025612 ('612) and Klaus-US 5,514,495. (Klaus)

Kameda sets forth in the Abstract and in column 4, lines 2-51; column 6, lines 33-52; column 12, lines 41-59 and column 14, lines 48-60 and Table I all of the claimed subject matter of the negative electrode of the present claims except for the specific amount of the vinylene carbonate and for the cellulose ether compound in the binder. It is noted that Kameda sets forth both cellulose and the like along with a butadiene copolymer rubber as examples of binders for the electrode. The '612 patent discloses a non-aqueous graphite anode battery having the claimed amount of vinylene carbonate in the electrolyte therein. To have included in the electrolyte of Kameda the amount of vinylene carbonate as taught in '612 would have been obvious for the known outstanding properties of the said battery with such electrolyte.

Klaus discloses a cellulose ether binder used with carbon in an electrode-see column 1, lines 26-35. To have incorporated in the electrode in Kameda the cellulose ether as taught by Klaus along with a butadiene copolymer rubber as the binder for the electrode would have been obvious for the known strong adhesive abilities of these materials.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Friday from 6:15-3:45.
